COMPETITION

Turkcell Lexathon

At the end of the competition, me and my teammates came in first in the competition where we combined law and technology called lexathon, organized by Turkcell and law offices.

AHMET YİĞİT

JR. BACKEND DEVELOPER

PERSONAL PROFILE

I am a student at Gebze Technical University and working to improve my self in backend technologies but I am also learning every path in coding.

WORK EXPERIENCE

Freelancer Fiverr and Bionluk

Jan 2020 - Present

EDUCATIONAL HISTORY

Gebze Technical University - Computer Engineering

October 2020 -

PROJECT

Computer Vision Project

January 2022

In this project, I coded the artificial intelligence that checks whether people wear masks and turned it into a product.

Live Wallet Project

February 2022

In this project, with a system where users can create and enter their own accounts, the instant prices of cryptocurrencies in the hands of users can see the profit and loss. Instant prices are taken with APIs.
