### PERSONAL PROFILE

I am an computer engineering student with an incredible passion for learning of software development and AI. Also, I am developing myself at financial issues.

### WORK EXPERIENCE

#### Freelancer

[Fiverr](#) || [Bionluk](#) | May 2020 - present

- I have provided software services to more than 15 customers from many parts of the world.
- I offer software support to my customers on topics such as automation bots, many assignments and projects. I also serve up a complete website coding service.
- I have managed to get full points from all the customers I have served so far.

### EDUCATIONAL HISTORY

#### Gebze Technical University

B.Sc in Computer Engineering | Oct 2020 - July 2025

- Studied project at [AI Development](#), also in [C](#) and [Java](#) language.
- Learned how to design algorithm and implement it in code.

### PROJECT

#### Mask Project

January 2022

- We have created artificial intelligence that understands whether the other person is wearing a mask. According to this decision, we also made a simple robot system that gives masks.
- I learned how to design and code ai, code communication with c language, python and Arduino.
